Webinar ID: 823 8474 6071

Description:

How to be a Friend to a Person with Dementia

For many older adults and those of us who work with them this question takes special meaning when we confront the onset of dementia in a friend. Dementia, which afflicts over 6 million people in the U.S. alone, affects cognitive abilities such as language and memory that are often understood as the necessary foundation for individual identity and human personhood—and impaired thinking may fracture relationships.

As such, dementia raises thoughtful questions about what are the boundaries of being human, what is required to be a friend and have meaningful social relationships.

Plan to listen and share your stories, thoughts, and wisdom about this important topic. Presented by Mike Splaine, Splaine Consulting.
