**Description:** Access to acute care services for those that live on tribal lands in rural and frontier communities is a constant challenge—and hospitalization of a person with dementia is generally risky and difficult.

The chat this week will be part one of a two part session Thoughtful Hospitalization™ where our speaker Mike Splaine will review practical action steps that family caregivers and those who support them might take to better prevent avoidable hospitalizations.

Please make sure to invite your caregiver coordinators for this important information.
