- Describe the data
- Review how to read your data
- How to provide better data

# Why is Data Important?

- Today, many decisions are based on data; therefore, populations with little or no data are easily overlooked (Urban Indian Health Commission, 2007).
- Provides an accurate picture of the Native elder population
  - Collecting custom fit data
- Helps set goals and priorities
- Identifies specific areas of health and social needs
  - Resource allocation
- Relevant actionable data
  - Assists policymakers, tribal leadership, directorship, and management make decisions based on facts and numbers.

# Data Challenges

- Data not being readily available to tribes.
- Significant gaps in data.
- National data sets are skewed due to misclassification of race/ethnicity.
- Small sample size in some cases.
- Unreliable

(Urban Indian Health Commission, 2007)

# Mission and Vision

## Mission

Identify and increase awareness of evolving Native elder health and social issues.

## Vision

To empower Native people to develop community based solution.

Honoring and helping to maintain cultural values.

## Why is the ION Data Important?

- Fulfill Title VI grant requirements
- Other funding opportunities
  - Secure funding and additional resources for Native elders

**\*MOST IMPORTANT\***  
**USE THE DATA**

## *Identifying Our Needs: A Survey of Elders*

- Assesses the health and social needs of Native Elders in Tribal Communities
- 3 year cycles
- Opportunity to collect information for their communities
- Technical assistance and training

# NRCNAA Research Model

# Cycle VI Summary

- Data collected in the time span of April 1, 2014 to March 31, 2017
- 18,134 AI/AN elders
- 164 sites
- 267 tribes
- Representation from:
  - 11 out of 12 Indian Health Service (IHS) Regions
  - 9 out of 10 Department of Health and Human Services (DHHS) regions
  - 28 out of 50 states

\*Cycle VII began April 1, 2017 and will end March 31, 2020

## Survey Needs Data

- General health status of elders
- Indicators of chronic health
- Activities of Daily Living (ADL's)
- Screenings
- Indicators of visual, hearing, and dental
- Memory and Disability
- Health Care Access
- Tobacco and alcohol use patterns
- Diet, nutrition, and exercise
- Social support pattern and housing
- Social Functioning
- Use and acceptance of services
- Demographics

# Steps in Title VI PPR Data Collection

**Step 1:** Title VI grantees submit annual reports to ACL that include information on nutrition, supportive, and caregiver support services as well as staffing information.

**Step 2:** The reports are reviewed by ACL staff.

**Step 3:** Tribal officials certify that the reports are accurate.

**Step 4:** The reports are uploaded to AGID.

## Administration on Aging: AGing Integrated Database (AGID)

The AGing Integrated Database (AGID) is an on-line query system based on ACL-related data files and surveys, and includes population characteristics from the Census Bureau for comparison purposes. The four options or paths through AGID provide different levels of focus and aggregation of the data - from individual data elements within Data-at-a-Glance to full database access within Data Files.

Before you begin your query, please review AGID's Resources section with an "About AGID" overview, instructional videos, descriptions of data sources, and frequently asked questions (FAQs). Even experienced AGID users may find the Resources videos and documentation helpful. At any time, you may select from one of the four options below and follow the system prompts. If you need additional assistance, please complete an AGID Support request from the link found at the bottom left of every AGID screen.

## Data-at-a-Glance

Data-at-a-Glance is a tool for generating quick estimates in table form, supplemented by map and chart graphical representations. Whereas other functions in AGID – State Profiles, Custom Tables, and Data Files – provide more expansive views of the data, Data-at-a-Glance is designed to examine a single data element at a time, giving the user the ability to explore the data for patterns, anomalies, or areas of interest.

To begin your query, please select the desired database from the list below:

### AoA Databases

#### State Program Reports (SPR) 2005-2014

Data on the supportive services programs and congregate and home delivered meals programs under Title III of the Older Americans Act, as well as the Title VII Elder Rights program.

### Census Databases

#### American Community Survey (ACS) Demographic Data 2004-2014

Population and housing characteristics data from the ACS for the 60 and older population, both individually and by sex and various age groups. Tabulations are produced from the 1-Year Public Use 5% Microdata Sample (PUMS) file.

- [ACS Data-at-a-Glance](#)

#### Population Estimates Data 2000-2014

Provides population estimates from various Census Bureau files and tools including the Census Population Estimates Program and the American Factfinder system. Rural counts and percents for 2010 are available from the 2010 Decennial Census data and can be accessed by clicking on the link under Census 2010.

State Profiles provides comparison tables or pre-populated tables of key data elements from OAA Programs for the selected state. In addition, the location of the State Unit on Aging (SUA), Area Agencies on Aging (AAA), and Tribal Organizations (when applicable) are displayed in both map and tabular form.

Using the menu on the left, select a table from the State Profiles Tables list, click on a Comparisons topic and sub-category, or select a National table with state-specific data to download.

Click on any part of the map to toggle the county labels on and off in order to see locations that may be behind a label.

Alaska is a single PSA state; therefore, there is no AAA location. The AAA symbol on the map references the location of the SUA.

## Custom Tables

Custom Tables allows users to produce detailed, multi-year tables in a step-by-step process and output the results in print or spreadsheet form. Users have the ability to select only those data elements applicable to their needs, and to further refine their results based on demographic stratifiers or geographic locations that are meaningful to their application. In addition, multiple years of data can be selected to analyze trends across time, data can be grouped by year or geography, and simple sorting tools have been incorporated to rank individual data elements across both time and geography.
